Prompt Sheet for Safety Talk

Before starting a cruise, attention must be drawn to the following:

turbulence Sliding windows to be locked into position and young people to be supervised near them if open (SV) Trapped fingers Locks and mechanisms Doors Bunks and table Clothing Footwear with grip Neckers not to be worn near equipment or at locks Fire Report to the Master and follow their instructions Do not panic No smoking Gas and electricity First ensure safe arrangements for supervision of equipment Weather If it's wet, take care on outer decks and water / lock side as they can become slippery		
Ensure young people are supervised on water - side / lock side Be aware that locks are dangerous with high levels of wate turbulence Sliding windows to be locked into position and young people to be supervised near them if open (SV) Trapped fingers Locks and mechanisms Doors Bunks and table Clothing Footwear with grip Neckers not to be worn near equipment or at locks Fire Report to the Master and follow their instructions Do not panic No smoking Gas and electricity If it's wet, take care on outer decks and water / lock side as they can become slippery	Falling in the water	 Explain how life jackets work – see separate sheet No running in vicinity of locks Take care when stepping on / off boat Keep arms and legs within confines of boat at all times Ensure young people are supervised on front deck (both
turbulence Sliding windows to be locked into position and young people to be supervised near them if open (SV) Trapped fingers Locks and mechanisms Doors Bunks and table Clothing Footwear with grip Neckers not to be worn near equipment or at locks Fire Report to the Master and follow their instructions Do not panic No smoking Gas and electricity Fire If it's wet, take care on outer decks and water / lock side as they can become slippery		Ensure young people are supervised on water - side / lock
people to be supervised near them if open (SV) Trapped fingers		 Be aware that locks are dangerous with high levels of water turbulence
 Doors Bunks and table Clothing Footwear with grip Neckers not to be worn near equipment or at locks Fire Report to the Master and follow their instructions Do not panic No smoking Gas and electricity Ensure safe arrangements for supervision of equipment Weather If it's wet, take care on outer decks and water / lock side as they can become slippery 		
 Bunks and table Clothing Footwear with grip Neckers not to be worn near equipment or at locks Fire Report to the Master and follow their instructions Do not panic No smoking Gas and electricity Ensure safe arrangements for supervision of equipment Weather If it's wet, take care on outer decks and water / lock side as they can become slippery 	Trapped fingers	Locks and mechanisms
Clothing • Footwear with grip • Neckers not to be worn near equipment or at locks Fire • Report to the Master and follow their instructions • Do not panic • No smoking Gas and electricity • Ensure safe arrangements for supervision of equipment Weather • If it's wet, take care on outer decks and water / lock side as they can become slippery		
 Neckers not to be worn near equipment or at locks Report to the Master and follow their instructions Do not panic No smoking Gas and electricity Ensure safe arrangements for supervision of equipment Weather If it's wet, take care on outer decks and water / lock side as they can become slippery 		
Fire Report to the Master and follow their instructions Do not panic No smoking Ensure safe arrangements for supervision of equipment Weather If it's wet, take care on outer decks and water / lock side as they can become slippery	Clothing	Footwear with grip
 Do not panic No smoking Ensure safe arrangements for supervision of equipment Weather If it's wet, take care on outer decks and water / lock side as they can become slippery 		Neckers not to be worn near equipment or at locks
 No smoking Ensure safe arrangements for supervision of equipment Weather If it's wet, take care on outer decks and water / lock side as they can become slippery 	Fire	 Report to the Master and follow their instructions
 Gas and electricity Ensure safe arrangements for supervision of equipment Weather If it's wet, take care on outer decks and water / lock side as they can become slippery 		Do not panic
Weather ■ If it's wet, take care on outer decks and water / lock side as they can become slippery		No smoking
they can become slippery	Gas and electricity	Ensure safe arrangements for supervision of equipment
	Weather	If it's wet, take care on outer decks and water / lock side as
General safety • No walking along the sides of the boat or on the roof at any		they can become slippery
time	General safety	 No walking along the sides of the boat or on the roof at any time

Add anything specific for your particular party.
